

northvolt[®]

Production of green and sustainable Li-ion
battery cells in Europe

20191128 – Peter Olofsson

The World's Greenest Battery

Low-carbon, circular and sustainable battery manufacturing begins at sourcing and (never) ends with recycling

A model for handling end-of-life batteries that is grounded in state-of-the-art recycling technologies and driven by environmental and industrial logic.

Northvolt R&D – Västerås, Sweden

Northvolt Labs – Västerås

Northvolt Ett – Skellefteå

Northvolt Ett – Skellefteå

- + Site preparation finished and first steel raised
- + Large-scale production expected to begin in 2021
- + The factory will be expanded to at least 32 GWh through 2024

Northvolt Ett – Skellefteå

Northvolt Ett – Skellefteå

Northvolt Zwei – Salzgitter
